

Who Are We?

M&M International Srl is located in Orio al Serio, Italy. A strategic location near Bergamo and only 45 kilometres north east Milan. The company was established in 1979 as a family owned organisation manufacturing solenoid valves and other components for the vending and industrial fluid control industry. Following growth in its home market it started building an international distribution network in 1990. Following extensive in house product development the product range expanded to include Piston Actuated Valves and Automatic Drain Valves in 1998. In 2000 M&M International Srl was acquired by Spirax Saco Ltd, a international engineering company who are the world leaders in the control and efficient use of steam and other industrial fluids. M&M International is now the group supplier of piston actuated valves, automatic drain valves and solenoid valves and supplies products to over 50 countries through out the world. The company is ISO 9001/2000 certified by DNV.

Our Vision

M&M International is a dynamic company focused on providing excellent service and reliable and innovative products to its growing customer base. We continue to invest in the business to support our drive to be an internationally recognised manufacturer of both solenoid and piston actuated valve products and solutions. Our vision which supports our strategy is:

M and M is the customers' preferred partner for solenoid and piston-activated valve solutions, winning market share through everyones' contribution to total quality and service, providing competitive, customised products and innovative solutions, beyond expectations.

The Facts

Business Area	Solenoid & Piston Actuated Valve Solutions
Foundation	1979
Turnover	€ 8.6M (2005)
Employees	92
Manufacturing Area	5000m ²
Number of Countries Covered	51

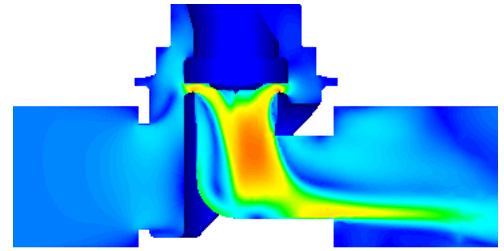

Technical Capability

M&M International understands that for a company to progress it must continue to invest in the latest technology to support its ongoing development plans.

The company currently employs 9 engineers in its technical department

developing both new products and customised solutions for its customers using the latest tools and techniques. Our current capability includes Solid Works 3D CAD system, access to Finite Element Analysis and Computational Analysis and a fully equipped UL qualified laboratory allowing us to undertake product testing to international standards.

Manufacturing Capability

Quality and customer service are of paramount importance to M&M International and to support this we have invested heavily in the latest technology to support our constant drive to fulfil our customers expectations.

We currently manufacture over 85% of the components used in the manufacture of our products and our facilities

include a modern machining facility, as well as a number of fully automatic assembly and test machines to guarantee 100% verification of manufacturing standards at competitive prices.

Products

M&M offers an extensive range of direct acting and pilot operated solenoid valves in brass, aluminium and stainless steel in sizes up to 2". Our range of piston actuated valves also continues to develop and we are now able to offer valves from 3/8" to 2" in stainless steel, brass and bronze with an extensive range of connections. In addition to our standard products we also manufacture a broad range of customised products to suit individual customer applications. A full list of approvals are available including CE, ATEX, UL and IMQ.
